FROM: Tom Munson, Senior Reclamation Specialist 

RE: Site Inspection, David Penney, North Picasso (Sliver 3-4 - S/001/057) and South Picasso (Sliver 1-2 - S/001/035) Projects, Beaver County, Utah

Date of Inspection: June 20, 2001
Time of Inspection: 9:20 a.m. – 10:00 a.m. & 10:30 a.m. – 12:00 noon
Conditions: Sunny
Participants: Tom Munson, DOGM

Purpose of Inspection: To inspect both sites while in the area and determine the acreages, then divide the sites into two small mines because of the travel distance separating them making them very distinctly two different areas. The land ownership is Private for the South Picasso Project area and BLM for the North Picasso Project.

Upon returning to the Division offices, it was determined that the Division will divide the Sliver 1-4 project (S/001/035) into two separate mining operations. The file number S/001/035 will now be called Sliver 1-2 which is the south pit area. A new number (S/001/057) has been assigned to the north pit area which will be called Sliver 3-4. The operator will be required to submit a new notice application for Sliver 3-4.

S/001/035 (Sliver 1-2)

I visited Mr. Penney's south Picasso pit site. I GPS'd the site and took photos. This south portion of the site sits on private land. The site looked much like the last time I visited it but it had expanded a little.

S/001/057 (Sliver 3-4)

I next visited the North Picasso Pit which sits on BLM land. It takes about ½ hour travel time between the south and the north pits. There is a question on the access road, I will have to talk to the BLM to determine if the road would be counted as part of Mr. Penney's disturbance. I GPS'd the site and took pictures.

There is a loading area down below and there is a steep road that winds up to the pit. I GPS'd the road going up to the pit, the pit area, and an exploration dig just to the east of the main pit. Photos were taken.

The access road that leaves the site follows the drainage for ½ mile. The average width of this road is 12-14 feet. I believe the BLM wants to count that road as part of the disturbance.
